

2021-2022年北京版数学一年级上册9.320以内的退位减法练习卷

1.

填一填

$$9 + () = 13 \quad () + 6 = 15 \quad 8 + () = 12 \quad 7 + () = 11$$

$$8 + () = 15 \quad 7 + () = 13 \quad () + 3 = 12 \quad 7 + () = 16$$

$$() + 9 = 18 \quad () + 8 = 11 \quad 8 + () = 16 \quad () + 7 = 12$$

2.

我会用想加算减法

$$\begin{cases} 8 + () = 15 \\ 15 - 8 = \\ 15 - () = \end{cases}$$

$$\begin{cases} 7 + () = 13 \\ 13 - 6 = \\ 13 - () = \end{cases}$$

$$\begin{cases} 5 + () = 14 \\ 14 - 5 = \\ 14 - () = \end{cases}$$

$$\begin{cases} 6 + () = 12 \\ 12 - 6 = \\ 12 - () = \end{cases}$$

$$\begin{cases} 8 + 6 = \\ \underline{\quad\quad\quad} \\ \underline{\quad\quad\quad} \end{cases}$$

$$\begin{cases} 7 + 5 = \\ \underline{\quad\quad\quad} \\ \underline{\quad\quad\quad} \end{cases}$$

$$\begin{cases} 6 + 5 = \\ \underline{\quad\quad\quad} \\ \underline{\quad\quad\quad} \end{cases}$$

$$\begin{cases} 9 + 3 = \\ \underline{\quad\quad\quad} \\ \underline{\quad\quad\quad} \end{cases}$$

3.

我会用破十法

$$17 - 9 = \square$$

$$14 - 8 = \square$$

$$15 - 7 = \square$$

$$13 - 5 = \square$$

$$12 - 3 = \square$$

$$11 - 2 = \square$$

$$13 - 6 = \square$$

$$14 - 7 = \square$$

$$12 - 4 = \square$$

4.

看谁算得又对又快。

$$13 - 8 = \quad 12 - 3 = \quad 15 - 7 = \quad 17 - 9 =$$

$$16 - 7 = \quad 13 - 5 = \quad 14 - 8 = \quad 15 - 6 =$$

$$12 - 3 = \quad 18 - 9 = \quad 11 - 3 = \quad 14 - 5 =$$

$$16 - 8 = \quad 13 - 7 = \quad 15 - 9 = \quad 12 - 6 =$$
