Some animals are so tiny that you cannot see them clearly. Others are huge. All of them are interesting. Let's have a look at some of them.

 The hippo(河马) is the third biggest land animal. It is a little smaller but heavier than the white rhino(犀牛). The elephant is the biggest animal on the land.

 The adult frog is a carnivore and will eat any other animal smaller than itself, including insects(昆虫) and even other Frogs. But it doesn't like eating grass and leaves. Many frogs are small, but the largest frogs are the Goliath frogs. They have the same size as baby sheep.

 Parrots(鹦鹉) are beautiful and clever. They have the feather with beautiful colors. They can live 40 years and even to 100 years. They like talking very much.
