

1.

If you're a student, developing the following skills will help you achieve success in school and in life.

Time management. High-school students have an average of 35 hours per week of class time and college students have an average of 15 to 18 hours per week. Manage your free time wisely and you'll make full use of each day.

Good study habits. If you've got them, it's great. If not, there's still them. Good study habits include the following:

- Finish homework in a timely manner.
- Always be prepared for class, and attend classes regularly.
- Review your notes daily rather than study for tests the night before.
- Set aside quiet time each day for study, even if you don't have homework or test the next day!

Good note-taking. You can't possibly set down everything the teacher says in talk at a pace of about 225 words per minute. But, you do need to set down the important materials. Note-taking should be in a way that's the most helpful to you. You can try writing notes on different colored cards. If you really have a problem with note-taking, you might ask your teacher if you can record daily lessons. Do whatever it takes.

Review of daily notes. Don't wait until the night before the test to review your notes. Go over your notes each day while the lecture is still fresh in your mind. Add any missing pieces. Compare your notes with a classmate's notes. Review your notes each day to improve your learning and build towards your final goal: mastery of the subject or skill.

【1】What's the purpose of writing the passage?

- A. It teaches students to manage their time.
- B. It gives students tips to achieve success.
- C. It stresses the importance of good study habits.
- D. It suggests students working hard and efficiently.

【2】What's important for forming good study habits?

- A. Finishing what you should do in time.
- B. Setting aside quiet time if there is a test next day.
- C. Having an average of 35 hours per month of class time.
- D. Putting down as much words as possible when taking notes.

【3】What is the main advantage of reviewing daily notes?

- A. To add any missing pieces to your notes.
- B. To help write down the important materials.
- C. To help you to master the subject greatly.
- D. To solve the problem with note-taking timely.

Every year from March to October, Christian Moullec, also known as "Birdman", takes to the skies aboard his adapted light aircraft. However, the 58-year-old Frenchman's daily 30-minute flight is not just to enjoy the impressive views, but to guide flocks (鸟群) of lesser white-fronted geese (小白额雁) through safe migration paths which the birds can teach future generations.

His deed began in 1995 when he noticed their declining population in the wilds of Lapland, Sweden. To prevent their numbers from dropping further, Moullec tried to get the threatened species to follow him along migration routes that would protect them from bird.

To help raise funds and awareness of his job to protect not just the geese but birds worldwide, Moullec often allows paying tourists to join him on the 30-minute-long flights aboard his aircraft. In addition to the trained birds flying alongside them, visitors, who come from as far as a 15-hour plane flight away, are treated to a variety of crane and geese species as well as breathtaking views of castles and cities.

He often brings his camera along for the flights, capturing photos not just for their beauty, but for what they describe. Moullec believes the use of agricultural chemicals has done harm to wild European birds, with more than a third disappearing in the last 30 years. "It's a disaster," he said. "My beautiful images with flying birds should be used to tell this story."

【1】What's the function (功能) of Paragraph 1?

- A. It gives a description of a birdman.
- B. It tells readers the birdman is very important.
- C. It tells readers birds are on the migration paths.
- D. It introduces the main idea of the whole passage.

【2】Why does Christian Moullec take to skies aboard his light aircraft?

- A. He needs to threaten the species.
- B. He wants to save the bird population.
- C. He needs to stay away from hunters.
- D. He wants to enjoy the beautiful views.

【3】How does he make it possible to guide the birds to migrate along the right paths?

- A. He attracts grown geese to follow his craft.
- B. He drives the geese when he is on his light aircraft.
- C. He raises young geese to be viewed as their parents.
- D. He feeds the geese to put them on the right paths.

【4】What else does he do for the birds?

- A. Raising funds and awareness of protecting birds.
- B. Inviting people to enjoy the beautiful views.
- C. Paying tourists to join him on the flight.
- D. Taking tourists to his flight.

The CCU (Charity Cycling UK) recently called on to raise awareness (觉察, 意识) of dooring after discovering that many people don't know what it is. Dooring is when a driver or passenger opens the door into another road user (typically cyclist) without looking for other road users.

The CCU chief officer Paul told Glou Live: Some people seem to see car dooring as a bit of a joke, but it's not and can have serious results. We want to see great
