

2021-2022年高一上期半期考试英语题免费试卷在线检测（重庆市永川北山中学校）

1.

I'm sure you know the song "Happy Birthday". But do you know who wrote the song and for whom it was written?

The retired professor, Archibald A. Hill in Lucasville, USA could tell us the story. Ninety-seven years ago, two of Mr. Archibald Hill's aunts, Miss Patty Hill and Miss Mildred Hill were asked to write some songs for a book called "Song Storied for the Sunday Morning". Miss Patty Hill and Miss Mildred Hill were both kindergarten teachers then. They loved children very much and wrote many beautiful songs for the book. One of them was the famous "Good Morning to You." The song said, "Good morning to you, good morning to you, dear children, good morning to all." This song was very popular at that time among kindergarten children. But not many grown-ups knew it. A few years later little Archibald was born. As his aunt, Miss Patty Hill sang the song "Happy Birthday" to the melody (曲调) of "Good Morning to you" to her little nephew. She sang the song like this: Happy birthday to you! Happy birthday to you! Happy birthday, dear Archie! Happy birthday to you! Miss Patty Hill and her sister had never expected that this song would become so popular, but it really did. People all over the world like the song because of its simplicity in tune (曲调) and friendliness in words.

【1】 Archibald A. Hill was \_\_\_\_\_ .

D.Yes, but the song didn't become popular.

2.

The Top 4 Lies Girls Hear

(1) "You'll never be good at math."

It's generally accepted that boys are good at math while girls aren't. The fact is that it isn't true—at least, it doesn't have to be. When girls reach their teens, most of them lose their interest in math. They're trying to be regarded as female. They want to stay away from things that are boy things, and math is still considered a boy thing. Math class is hard, but if you gave it a chance you could be great at math, especially because you are a girl.

(2) "Being skinny is good, and how you diet is your business."

Lots of web sites tell visitors that losing interest in eating is a beautiful thing. These "skinny is better" sites
