11.

According to a new study, a lot of kids don't drink enough water. Erica Kenney, a scientist at Harvard's T. H. Chan School of Public Health, planned to look into the amount of sugary drinks kids drank at first. However, she found many kids had not enough water to drink.

Kenney and her team studied a group of 4, 000 children, aged 6 to 19, between the years 2009 and 2012. She noticed that more than half of the kids were dehydrated (脱水的). Boys were 76% more likely
