Reusable straw with cleaner & case

This stainless steel straw is a good product to replace single-use straws. The straw folds into four, meaning you can carry it in your pocket. It's also easy to clean, thanks to the supplied brush. You can get it now for just \$24.99, that's 50% off.

Aduro Homedome Smart Outlet (插座)

This new product fits in any outlet and allows you to control the power supply through your phone. This means you can cut your energy use, from lights to heaters. The Aduro is now 60% off at just \$19.99.

Omega AXL Inkless Pen

Millions of ballpoints are made and thrown away each year. The Omega AXL is a green replacement---this amazing pen puts down perfect lines using a special kind of aluminium. It never runs out and your drawings will always stay clear and tidy. Worth \$39.99, the Omega pen is now discounted to \$29.99.

Altgalley chopsticks

Disposable chopsticks are another example of unnecessary waste. The Altgalley chopsticks are better for the planet, and they won't affect the taste of your dish. In addition, they are specially designed so they will stand upright. This makes sure that the chopsticks stay clear of restaurant-table dirt. You can get a pair now for \$11.99, saving 33 percent on the usual price.

【1】Which product offers the highest discount ?

- A. Reusable straw. B. Altgalley chopsticks.
C. Omega AXL Inkless Pen. D. Aduro HomeDome Smart Outlet.

【2】What do we know about the Omega AXL Inkless Pen?

- A. It can be used for a very long time. B. It is a kind of ballpoint pen.
C. It can be easily erased. D. It can stand upright.

【3】What do the four products have in common?

- A. They can be connected to smart phones.
B. They are widely popular with families.
C. They are environmentally friendly.
D. They are easy to carry and clean.

Judy Wright and her husband decided to move closer to their son, Chris, who lived in Georgia. About a month after the move, Judy fell ill, suffering from her ongoing (不间断的) battle against Parkinson disease.

Her condition worsened rapidly and she required medical care at home. The family hired a nursing aid who canceled at the last minute. Instead, a woman named TunDe Hector showed up in her place.

One day, TunDe shared a story with Judy and her family. She remembered a particularly difficult day in 2014, when a stranger had helped her with a kind gesture. She had run out of gas, and with only \$5 in her pocket, was walking to a gas station. A man saw her walking and turned his car around. He paid for her gas and gave her all the cash left in his wallet. Upon hearing the story, Judy's son, Chris, took off his hat and said, "That was me!" He was the stranger that had helped TunDe on that difficult day.

During the care of Judy, the Wright family learned about TunDe's family and her own dream. The nursing aid, TunDe hoped that one day she could become an OB-GYN nurse. Her tuition was past due (逾期) and she had a family to care for, but she was determined to achieve that goal for herself and her family.

Judy died on July 9, 2017. Instead of flowers, her family asked mourners (悼念者) to donate to TunDe's education, to assist her in paying for her nursing school. In less than a week, they raised more than \$8,000 and presented her with the surprise check.

【1】Why did Judy's family choose TunDe in the end?

- A. To help her with a kind gesture. B. To look after Judy in the hospital.
C. To replace another nursing aid. D. To give Judy the best medical care.

【2】How might Chris feel when hearing TunDe's story?

- A. Thrilled B. Shocked
C. Puzzled D. Delighted

【3】How did the Wright family help TunDe after Judy's death?

- A. They paid for her education. B. They helped care for her family.
C. They bought her a surprise present. D. They helped her realize her dream.

【4】What does the whole story mainly tell us ?

- A. Kindness comes full circle. B. Constant dropping wears stone.
C. The truth never fears investigation. D. Actions speak louder than words.

3.

What do you usually do when a flying insect lands on your arm? Most likely you blow it away.

But what if that bug were a ladybug (瓢虫)? Then chances are you would let it stay. What is it about ladybugs that we like?

Farmers once thought ladybugs were a good luck sign. A ladybug in the field meant that the crops (庄稼) would be successful and the weather would be good. The farmers may have been exaggerating (夸大) about what a very small bug can do, but in fact ladybugs do help out with the crops. They eat harmful insects.

Actually, it is not the adult ladybug that eats the other insects. It's the ladybug larvae (幼虫). Ladybugs lay their eggs on leaves that are covered with aphids or other insects. When the larvae come out of the eggs, they are very hungry and will eat mites, aphids, mealybugs, green flies, and other crop-destroyers. A single ladybug larva can eat over 1,000 aphids in one day. In the 1800s, ladybugs were brought all the way from Australia to California and set free among orange trees that were dying from being eaten by insects. The little red and black "eating machines" completely saved all the trees.

Ladybugs go about their daily business without worrying much about anything. Very few birds or insects will eat a ladybug because it gives off something that is dangerous to eat. Ladybugs also protect themselves by playing dead. They fall off leaves and remain very still until their enemy goes away.

So next time you see a ladybug, think about what it may be up to. Maybe it is off to save an orange tree. Maybe its next move will be to fall off a leaf and play dead or stand up to a bird about 100 times its size. Maybe it's letting you know that the weather will be good tomorrow. Who knows? Ladybugs are special that way.

【1】What do we know about mites and aphids?

- A. They do harm to the crops.
B. They eat more than they should.
