iD Tech Summer 2020 registration opens November 1st, 2019!

Register for iD Tech, the world's first summer technology camp for kids and teens aged 7 to 19 right now and enjoy an unforgettable summer tech experience which will inspire the next generation of coders, app developers, engineers, and innovators.

Why iD Tech?

With millions of unfilled STEM jobs around the world, coders, game developers, robotics engineers and designers are in demand like never before. From this aspect, iD Tech is an investment in your child's future. With over 20 years of experience, we provide the best of the best locations, instructors, and tools for long-term student success.

Innovative Courses, all skill levels

Choose from the hottest courses in coding, AI, machine learning, game development, robotics, video production and more. We can transform your child's love of apps, games or social media into real-world skills for school, college and dream jobs.

Held at 159 well-known universities worldwide

Learning environments matter. Get inspired on a top campus, from Caltech and NYU to HKU to University of Cambridge with expert instructors, guaranteed small classes of 5 to 10 students and a safe learning environment.

Say 'yes' to flexibility!

If your summer plans change, make unlimited updates to your registration — with no fees — up to 3 weeks before your start date. Many other summer camp organizers often fail to do so, which often brings you much inconvenience.

A proven track record of student success

With summer programs, our skill development system paves the way for college, internships, and dream careers. 9 out of 10 iD Tech alumni go on to attend a 4-year college and pursue a STEM career. We know how to get you there and see first-hand how iD Tech programs are getting people started in tech, especially girls who deserve the support they need to succeed in STEM.

【1】Who is iD tech summer camp intended for?

- A. The iD tech instructors. B. World-famous universities.
C. Students seeking success in STEM. D. Parents interested in iD.

【2】Why is 'iD tech' flexible for students?

- A. Registration can be changed free.
B. It allows students to study online.
C. Instructors create a good environment.
D. It leads to more job opportunities.

【3】The record of student success is used to make the ad more ____.

- A. technical B. interesting
C. professional D. persuasive

The year was 1999. I was 18, living with friends in a town about an hour north of Milwaukee. Desperate for adventure, we often talked about haunted (闹鬼的) locations, and even wandered around the woods near Rienzi Cemetery. So when a friend shared a story about an abandoned house just down the road from Rienzi, how could I possibly resist? The group of us jumped in the car and headed off into the wild unknown, completely unaware of the misfortune that would soon befall us.

The house was isolated, overgrown and barely visible from the road. Most of its windows were broken. It seemed completely neglected except the locked door and a NO ENTRY sign outside. How would anyone notice, or possibly even care, if we went in and looked around?

We stole inside, hoping for anything to prove the legend. Nothing valuable was found until an old letter, addressed to a Mr. J. Witherell, caught my eye. Its paper was stiff and yellowed. Excited by the physical evidence, I slipped the letter into my back pocket. I was about to exit the house when I noticed firetrucks and police cars lining up out on the road. While most of us were exploring the house, one of us managed to knock a fire detector off the ceiling, which triggered an automated alarm at the fire department. I quickly alerted the others, but there would be no escape.

After a moment of panic, we decided to go outside and face the music. To avoid a theft charge, I left the letter where it was before stepping outside.

The result? Not only did we all get fined for entering, we were required to pay for property damage totaling \$1,500 each — too much for us to afford.

For so many years, I have been wondering: Why is the deserted house so heavily protected with detectors and other security measures? Why is the property regularly maintained? What's the story behind that mysterious letter?

【1】What did the shabby appearance of the house seem to remind the kids?

- A. They would have no trouble entering it.
B. Their entry would bring them a surprise.
C. Their entry would disturb the neighbours.
D. Their behavior would be noticed by its owner.

【2】Why did the author attempt to take the letter away?

- A. It might reveal who had been maintaining the house.
B. It might help uncover the mystery of the abandoned house.
C. It must have been written to disclose a tragedy.
D. It was an evidence of the house being heavily protected.

【3】What led the police cars and firetrucks to arrive so quickly?

- A. The police officers were checking there.
B. The house owner reported to the police.
C. The police cars were passing by accident.
D. Some boy started the fire alarm system.

【4】What can we infer from the last paragraph?

- A. The empty house has been under strict protection.
B. The author wonders why they got fined.
C. No maintenance to the house is conducted regularly.
